

		SEI PROJECT 4 MERN-stack Application CODE REVIEW			
Student Name					
Metro					
<i>All criteria are minimum requirements and all must be met in order to pass.</i>				Link to Project 4 Requirements	
Planning & Presentation Requirements				Local Inst:	
Planning				<i>Complete?</i>	<i>Comments (optional)</i>
A "public" Trello board used for the project's planning					
"Ice Box", "Current/MVP" & "Completed" Trello lists for holding User Story cards					
User stories follow the "As a <user role>, I want <feature>, because <reason>" format (<reason> is optional if it's blatantly obvious)					
Trello contains a "Wireframes" list with wireframes for the app's main functionality					
Trello contains an "ERD" list with an Entity-Relationship-Diagram for the app's data model					
Presentation				<i>Complete?</i>	
Project introduced by paraphrasing the README					
Deployed app launched by clicking the link in the README					
Signed up a new user, then immediately logged out					
App's features demonstrated using the "preferred" user					
Showed the code for the "main" Mongoose model, favorite Express controller, favorite React component & client-side routing					
Shared their key learnings/takeaways					
Project Assessment					
Project assessment passed					
Technical Requirements				Global Inst:	Jim C.
				<i>Complete?</i>	<i>Comments (optional)</i>
App is a working MERN-stack (or instructor approved) app					
Token-based authentication implemented (sign-up, login & logout)					
Basic authorization is implemented that restricts access to CUD functionality from anonymous users. Navigation dynamically responds to the login status of the user.					
App is appropriately scoped. If full-CRUD is not implemented, one or more of the following should be implemented: consuming an API; admin user functionality; real-time communications, etc.					
App looks and feels similar to apps we use on a daily basis - it has a consistent and polished user interface					
Necessary Deliverables				Global Inst:	Jim H.
				<i>Complete?</i>	<i>Comments (optional)</i>
The full-stack app is deployed					
Frequent commits dating back to the very beginning of the project. Commit messages should be in the present tense.					
A README.md file with these sections:					
App Title (contains a description of what the app does and optional background info)					
Screenshot(s): App's landing page and any other screenshots of interest					
Technologies Used: List of the technologies used					
Getting Started: Includes a link to the deployed app and the Trello planning					
Next Steps: Planned future enhancements (icebox items).					
Summary					
Does project meet minimum requirements and is passing?					
Overall Comments:
